DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-17 and 30-31, drawn to an analyzer, classified in class 422, subclass 72.
 - II. Claims 18-21, drawn to a method of transporting a probe tip, classified in class 436, subclass 49.
 - III. Claims 22-28, drawn to a method of analyzing a sample s, classified in class 436, subclass 47.
 - IV. Claim 29, drawn to a software carrier, classified in class 711, subclass 4.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions II, III and I are related as process and apparatus for its practice.

The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case the apparatus can be used as a sample storage system.

3. Inventions I and IV are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In

the instant case the sample analyzer, as claimed, does not include a controller / computer which would be used together with the 'computer usable medium' of claim 29.

4. Note that the claims of Group I, if elected, are subject to further restriction, since the group contains claims directed to the following patentably distinct species of the claimed invention:

Species I (claims 1-14 and 30-31), drawn to drawn to an analyzer comprising a transport system with a holder for a probe tip dispenser, test elements and sample supply.

Species II (claims 15-17, drawn to drawn to an analyzer comprising a transport system with a centrifuge module.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, no claims are generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over

the prior art, the evidence or admission may be used in a rejection under 35

U.S.C. 103(a) of the other invention.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

5. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

6. A telephone call was made to Mr. Todd Burns on 02/28/07 to request an oral election to the above restriction requirement, but did not result in an election being made.

Conclusion

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Natalia Levkovich whose telephone number is 571-272-2462. The examiner can normally be reached on Mon-Fri, 8 a.m.-4p.m..
